Continuation of 11. does NOT place the application in condition for allowance because:

Applicant's primary argument, "Kaminsky does not disclose a reflecting layer deposited on the first surface of the base film and the protrusion", is not considered persuasive, whereby the Examiner rendered a broad interpretation of the claim language as stated by the Applicant [MPEP 2111]. At present, the prior art remains commensurate to the scope of the claim, since Kaminsky (U.S. Patent 6,898,012) teaches a reflecting layer being deposited on the first surface of the base film and the protrusion in combination [note drawing below].

With regards to Independent Claim 1, Kaminsky discloses a reflector including:

- A base film [Figure 1: (20)];
- A protrusion [Figure 1: (22, 24, 30, 32)] provided on a first surface, whereby the first surface is substantially flat; and

- A reflecting layer [Figure 1: (34)] deposited on the first surface of the base film and the protrusion, for reflecting light generated from a lamp [Figure 2: (18)].
